

How to install

Introduction

The following is a description of the installation procedure for Capalnstaller.

Download the web installer from here: [Download](#)

The setup wizard contains a Microsoft SQL Server Express installation that can be chosen if that fits the purpose. The express editions have limitations, and these can be seen [here](#)

The Setup wizard automatically downloads the newest components from CapaSystems including updates to the setup wizard itself. This ensures an always up-to-date installation.

The amount of data being downloaded differs, however redistributable files such as Microsoft .NET Framework requires a larger amount of data to be downloaded.

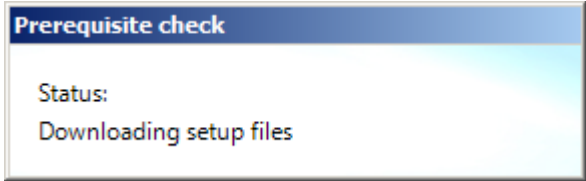

Files are downloaded to %CommonProgramFiles%\Capalnstaller\Setup

If you do not have access to the Internet please refer to the section "[How to install without internet access](#)"

During installation or update of Capainstaller please observe if antivirus locks one or more files when they are being copied to the server.

If so, it can be necessary to disable antivirus during the process.

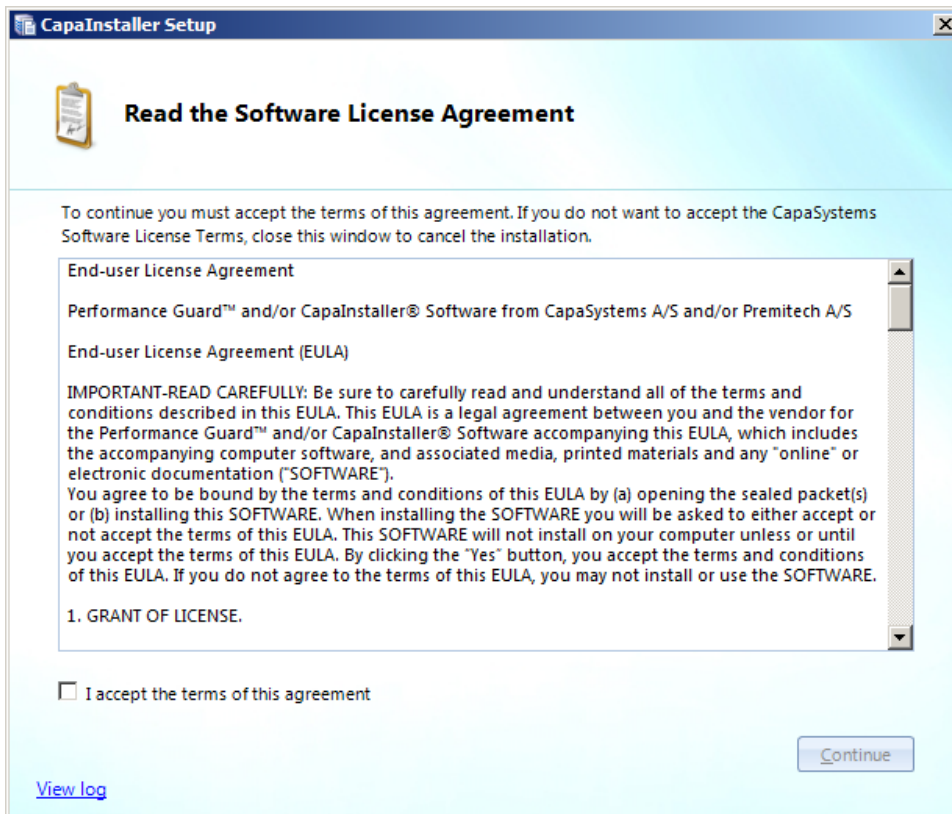

Installing the Management Portal is done separately on the web server dedicated to hosting the Portal > [Install and configure access to Capalnstaller Management Portal](#)

Step	Action
1	Required components will automatically be downloaded. 

2 Enter the license key.

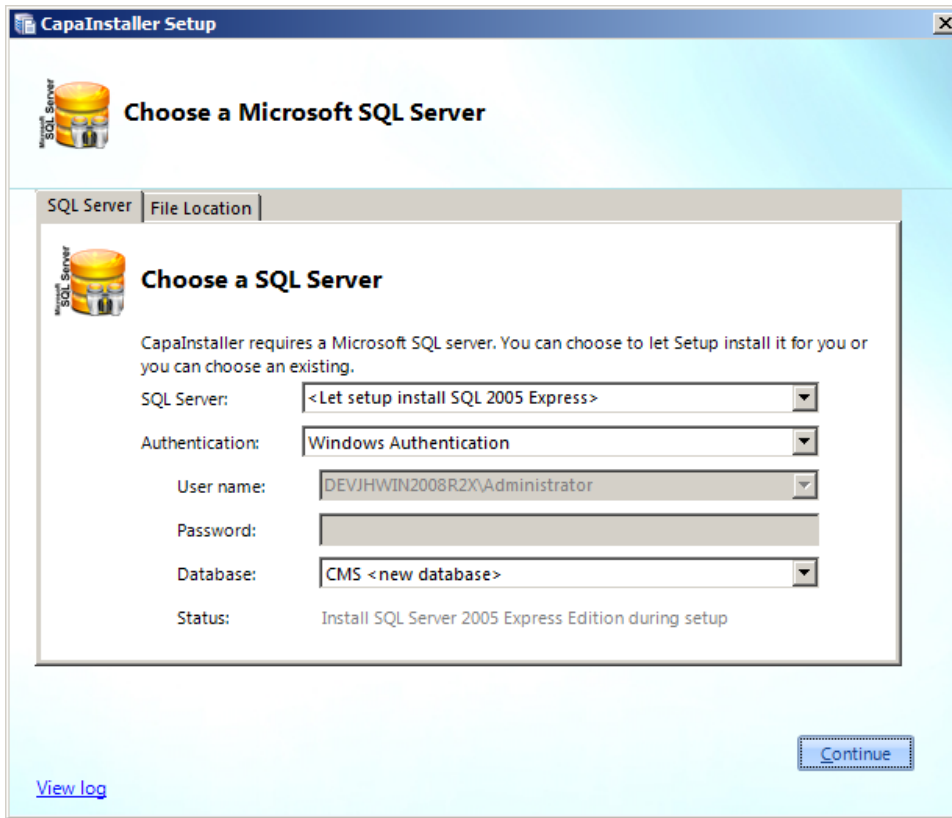

3 Accept the end user license agreement (EULA).

4

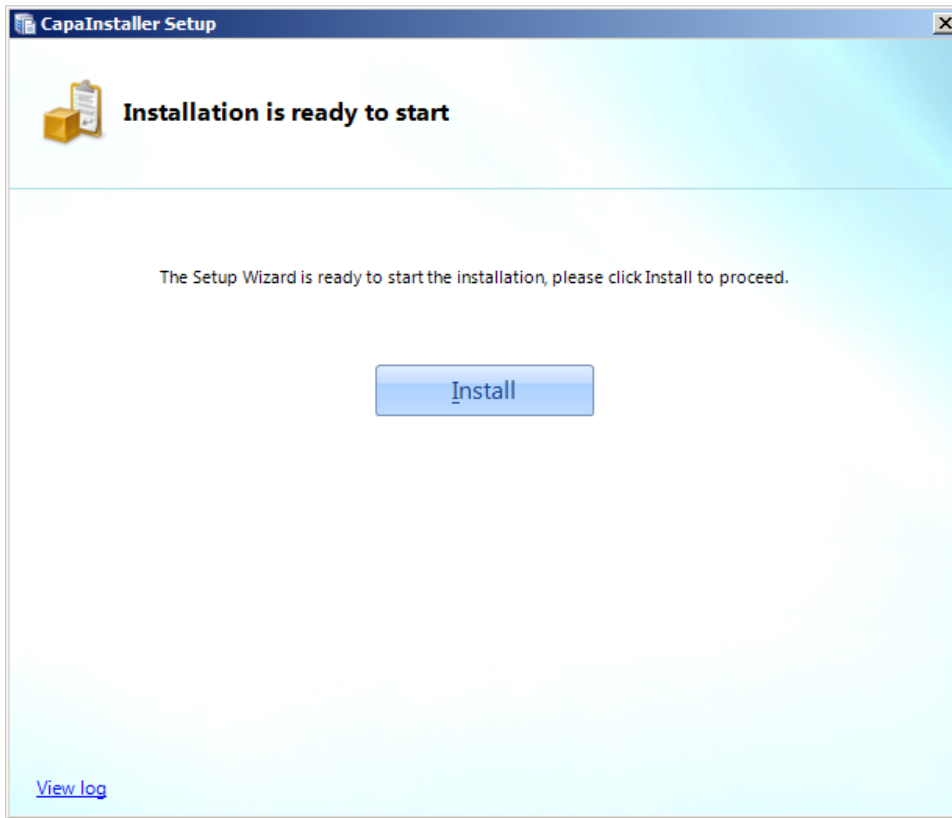

Specify a database, authentication and file location.

Note. When selecting SQL Authentication, make sure the SQL server has Mixed Mode enabled and the supplied SQL user has permissions to create and alter databases.

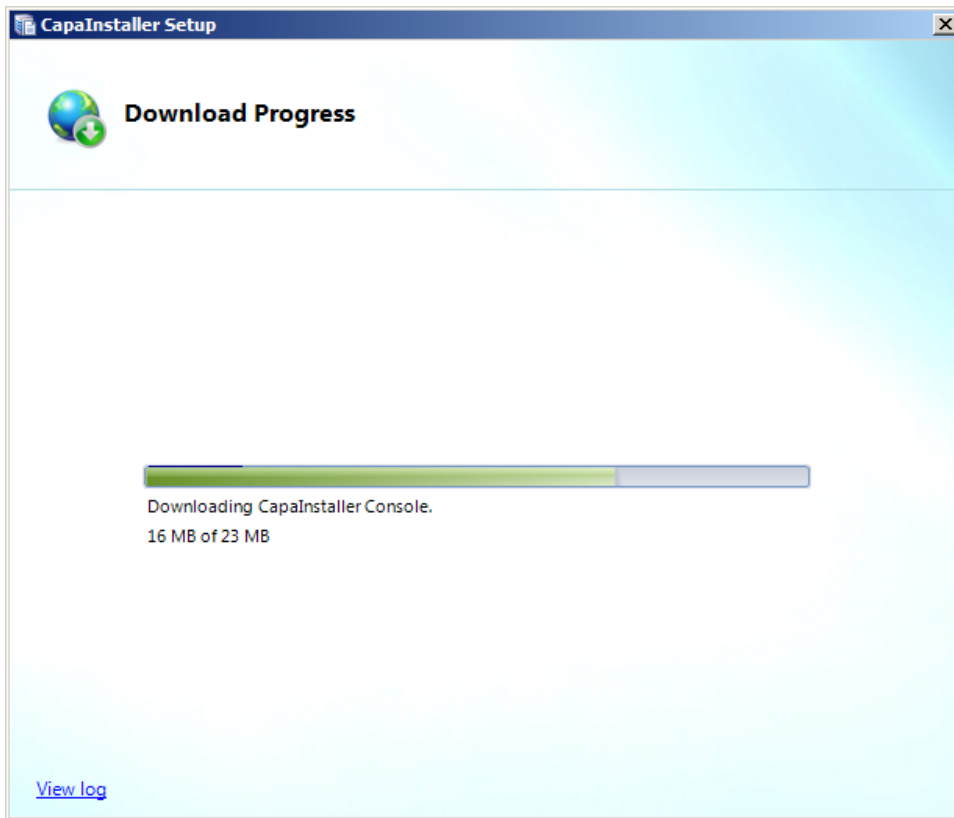

The screenshot shows the 'CapaInstaller Setup' window with a light blue background. At the top, there is a title bar with the text 'CapaInstaller Setup' and a close button. Below the title bar, there is a small icon of a yellow and orange container and the text 'Choose a Microsoft SQL Server'. The main content area is divided into two tabs: 'SQL Server' (selected) and 'File Location'. Under the 'SQL Server' tab, there is a sub-dialog titled 'Choose a SQL Server' with a similar icon. The sub-dialog contains the following text: 'CapaInstaller requires a Microsoft SQL server. You can choose to let Setup install it for you or you can choose an existing.' Below this text are several fields: 'SQL Server:' with a dropdown menu showing '<Let setup install SQL 2005 Express>', 'Authentication:' with a dropdown menu showing 'Windows Authentication', 'User name:' with a dropdown menu showing 'DEVJHWIN2008R2X\Administrator', 'Password:' with an empty text box, 'Database:' with a dropdown menu showing 'CMS <new database>', and 'Status:' with the text 'Install SQL Server 2005 Express Edition during setup'. At the bottom right of the sub-dialog is a 'Continue' button. In the bottom left corner of the main window, there is a 'View log' link.

5 The setup is ready to install, Click Install to proceed

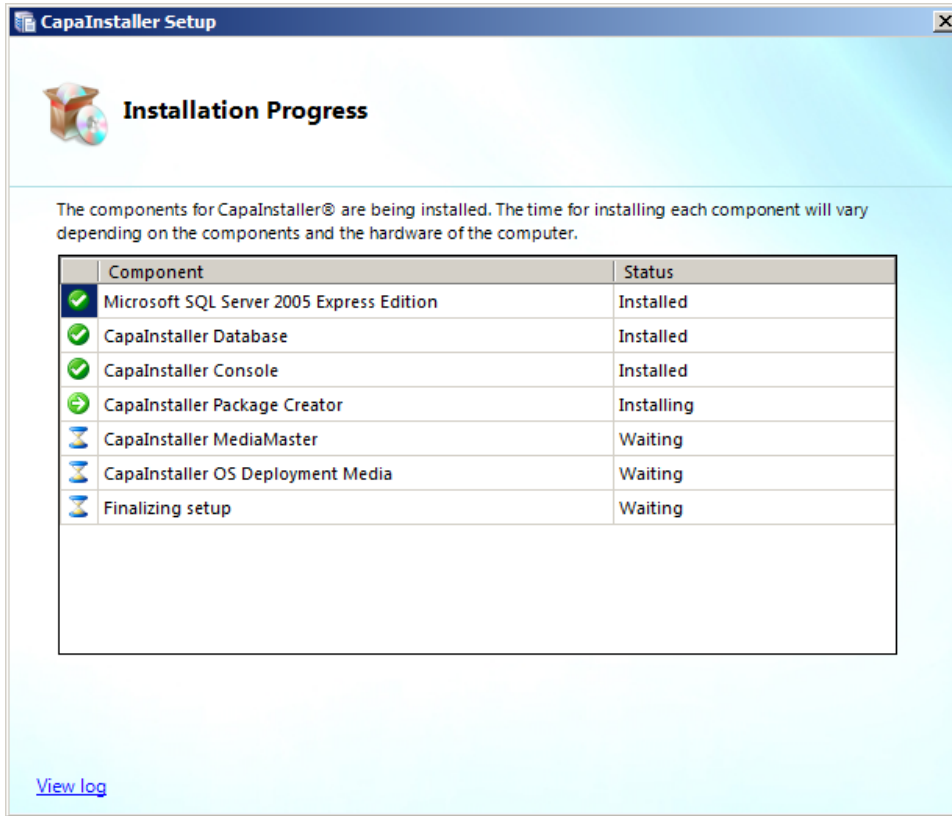

6 If you have chosen the web installer, the wizard will download the files needed for the installation

If you have chosen an offline installation, the wizard will copy the files to the needed locations

7 Components are being downloaded and installed.

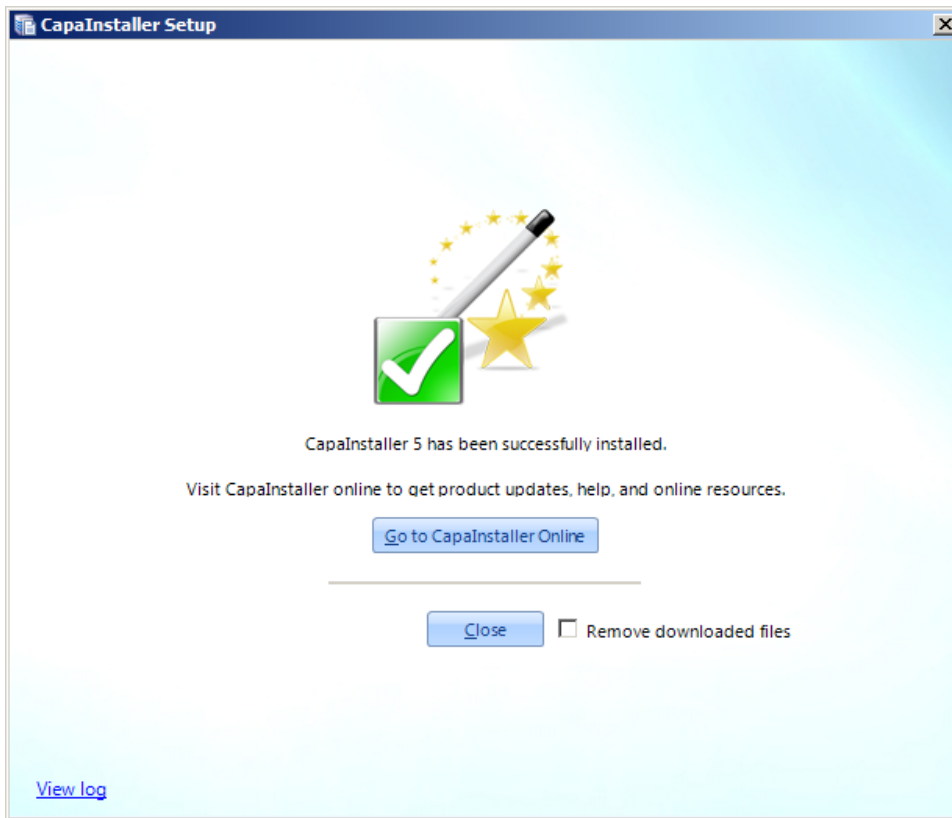

The screenshot shows a window titled "CapaInstaller Setup" with a close button in the top right corner. Below the title bar is a header area with a CD/DVD icon and the text "Installation Progress". A paragraph of text states: "The components for CapaInstaller® are being installed. The time for installing each component will vary depending on the components and the hardware of the computer." Below this text is a table with two columns: "Component" and "Status". The table lists seven components with their respective status and icons. At the bottom left of the window, there is a blue link labeled "View log".

Component	Status
 Microsoft SQL Server 2005 Express Edition	Installed
 CapaInstaller Database	Installed
 CapaInstaller Console	Installed
 CapaInstaller Package Creator	Installing
 CapaInstaller MediaMaster	Waiting
 CapaInstaller OS Deployment Media	Waiting
 Finalizing setup	Waiting

[View log](#)

8 If the setup has failed, a button pointing to the log file is displayed instead of the button linking to Capalnstaller Online.

If you want to clean up the downloaded files, select *Remove downloaded files* and click close

9 Go to the [getting started](#) document and go to the steps after how to install
