

Ini_GetAllSectionVariables

Description

Reads all entries in section

Syntax

Ini_GetAllSectionVariables(sFile,sSection, sSeperateChar, bReturnAsArray, bMustExist) As Boolean

Parameters

sFile (String)

Filename

sSection (String)

Section name

sSeperateChar (String)

Char between each section-header

bReturnAsArray (Boolean)

Section-list must be returned in array

bMustExist (Boolean)

File must exist

Return value

If bReturnAsArray is true the list of entries will be returned in gaValue otherwise the list will be returned in gsValue separated by sSeperateChar

Example

VBScript

```
If bStatus Then bStatus = Ini_GetAllSectionVariables("C:\CapaInstaller.ini", "SectionName", "|", True, True)
If bStatus Then
  For index = LBound(gaValue) To UBound(gaValue)
    bStatus = Job_WriteLog("Custom", "Index #" & index & ": " & gaValue(index), bStatus, False)
  Next
End If
```
