

# Net\_AddPrinter

## Description

Adds a network printer to the computer. Only printers on Windows networks are supported

## Syntax

Net\_AddPrinter(sPrinterShare, s9xPrinterDriver, bSetAsDefault) As Boolean

## Parameters

*sPrinterShare (String)*

UNC path to the network printer

*s9xPrinterDriver (String)*

Printer driver name (only Windows 9x and ME)

*bSetAsDefault (Boolean)*

Set this printer as default printer

## Example

### VBScript

```
'Add a printer
If bStatus Then bStatus = Net_AddPrinter("\\CAPAINSTALLER\PRINTERSHARE", "", True)

'Add a printer in Windows 9x/ME
If bStatus Then bStatus = Net_AddPrinter("\\CAPAINSTALLER\PRINTERSHARE", "HP DeskJet 1200N", False)
```
